KRUCE BLAKE

SKILLS

C#, .Net Core, .Net, MVC, Entity Framework, Node.js, Vb.Net, WebForms, WPF, LINQ, Javascript, JQuery, Css, Scss, Html, Sql, Mongo, CI/CD, Xaml, Xml, JSON, APIs, Bootstrap, VB Script, Sitecore, Sharepoint, etc.

SOFTWARE

Visual Studio, TFS, Git, XCode, dotPeek, Notepad++, Dev Express, Sitecore, IIS, SSMS, Toad, Robo 3T, Windows Powershell, Adobe Dreamweaver, Adobe Photoshop, Adobe Fireworks, Adobe Acrobat, etc.

EXPERIENCE

City of Worcester : Worcester, MA – Application Developer

December 2018 – PRESENT

- Create, update and maintain websites using .Net Core technology.
- Create, update and maintain SQL databases and stored procedures.
- Deploy and maintain web apps through IIS.

SilverTech : Manchester, NH – Software Developer

September 2017 – December 2018

- Create, update and maintain websites for clients using latest.Net technology and mainly C#.
- Give clients the ability to maintain their sites by building on top of popular Content Management Systems if required.
- .Net best practices.

Palm Beach County : West Palm Beach, FL – Programmer

May 2017 – September 2017 (Moved from FL to New England)

- Create and maintain n-tier enterprise applications using C# MVC.
- Use Toad and PL-SQL to write stored procedures.
- .Net best practices.

City of Port St. Lucie : Port St. Lucie, FL – Programmer/Application Developer

November 2011 – May 2017

- Main work done was building and maintaining C# MVC web applications using SQL and Entity Framework. Other examples of work below.

- Create and implement new applications from beginning to end. (E.g. speaking with the user(s), flowcharts, database design diagrams to database creation and implementation, coding, UI, documentation, training, integrating the new system into user's current workflow, updates, etc.).
- Improve old code written in various languages. (E.g. Classic ASP using vbscript to ASP.net using C#).
- Update and/or maintain previously written code, forms, etc. (E.g. PHP mailer forms and older javascript.)
- Design and implement databases. (E.g. Design a SQL database using UML database diagrams, and create a local version through SQL Server Management Studio to implement upon approval.)
- Rewrite outdated applications. (E.g. Older Microsoft Access programs to WPF)
- Working with a team of fellow application developers/programmers or alone when necessary.
- Documentation. (E.g. Commenting my code and writing tutorials for users)
- Testing. (E.g. Implementing unit tests and testing personal code)
- Worked with Vb.Net, C#, SQL, WebForms, MVC, etc.

Gap Inc. : Jensen Beach, FL – Customer Service

August 2006 – November 2011

- Manage register and be responsible for handling large amounts of money.
- Interact and provide positive customer service.
- Manage fitting room and store upkeep.

EDUCATION

Florida Atlantic University – Bachelors, Computer Science

In Progress, Boca Raton, FL & Online

Indian River State College – Associate of Arts, Computer Science

2012 – 2016, Fort Pierce, FL

St. Lucie West Centennial High School

2003 – 2007, Port St. Lucie, FL

CERTIFICATIONS

Sitecore Professional Developer, Progress Sitefinity Certified Basic Developer, Kevin Mitnick Security Awareness Training 2016, Sharepoint 2013 Power End User, CJIS Security & Awareness Certified.
